Poland · CET (UTC+1) · EN / PL

15 years of building and running web products end to end: Laravel and Nuxt applications, API and ERP integrations, e-commerce platforms and the Linux servers underneath. I work directly with companies and as a senior contractor for software houses and agencies, under NDA and white-label when needed.

## SERVICES

### Web applications

Custom systems, SaaS, client portals and internal tools in Laravel / PHP with tests and documentation.

### API & ERP integrations

REST API design, webhooks, two-way sync with ERP, WMS, accounting, payment and shipping systems.

### Linux servers & DevOps

VPS and dedicated servers: Nginx, PHP-FPM, MySQL tuning, backups, monitoring, SSL, CI/CD.

### Front-end & UI

Vue 3, Nuxt, Nuxt UI and Tailwind CSS. Mobile first, accessible, tuned for Core Web Vitals.

### E-commerce

WooCommerce, PrestaShop, Shopify and WordPress: modules, themes, migrations, feeds, performance.

### Rescue & maintenance

Taking over legacy projects: audits, upgrades, security patches and long-term care.

## TECHNOLOGY

|                |                                                                 |
|----------------|-----------------------------------------------------------------|
| Back-end       | PHP 8, Laravel, Node.js, REST, queues                           |
| Front-end      | JavaScript, Vue.js, Nuxt, Nuxt UI, Tailwind CSS, HTML, CSS      |
| Data           | MySQL / MariaDB, SQL, Redis                                     |
| Platforms      | WordPress, WooCommerce, PrestaShop, Shopify                     |
| Infrastructure | Linux (Debian / Ubuntu), Nginx, Git, CI/CD, backups, monitoring |

## WAYS TO WORK TOGETHER

### Fixed-scope project

Defined deliverables, fixed price and timeline.

### Time & materials

Hourly or daily rate, team extension, white-label for agencies.

### Monthly retainer

Maintenance, server administration, priority support.

## HOW I WORK

### Clear proposals

Scope, architecture, timeline and a fixed price or transparent estimate up front.

### Built to hand over

Readable code, tests, README and runbooks. You own everything.

### Visible progress

Short iterations, a staging environment from week one, weekly updates.

### Your workflow

Git flow, code review, CI pipelines, Jira and Slack. I adapt to your team.
